Deswik.IS
Underground Coal
TRAINING MODULE PROFILE

⇆	1.5 days	👤	5.05
PROGRAM	DURATION	DELIVERY	MODULE ID

The Deswik.IS for Underground Coal module uses pre-existing design data to generate graphical tasks which are directly linked to Deswik.Sched. These tasks are then designed, modified with dependencies applied and resources assigned to deliver a working Underground Coal schedule.

Deswik.IS Module
- Loading Deswik.IS

Deswik.IS Setup
- Importing data
- Creating legends and filters
- Configuring and viewing grid data

Project Options
- Defining and building attributes
- Interrogating fields and settings
- Derived tasks

Activities
- Setting up activity types
- Creating tunnels
- Modifying design and re-creating tasks

Attributes
- Assigning attributes

Dependencies
- Creating manual dependencies
- Creating automatic dependencies
- Animating the schedule

Resources
- Assigning resources
- Resource leveling

Interactive Updating
- Performing batch updates
- Creating derived tasks
- Updating scheduler attributes from the graphics
- Updating graphics attributes from the scheduler
- Updating start and finish dates from the scheduler
- Updating survey actuals
