Deswik.OPS
Foundations
TRAINING MODULE PROFILE

PROGRAM	**4** hours DURATION	DELIVERY	**1.20** MODULE ID

Deswik.OPS is a web-based, operations scheduling, production data management and collaboration tool. Integrating with your organization's longer-term schedules, it enables production planners to rapidly create detailed, activity-based shift plans directly from the short-term schedule.

This module introduces you to the key concepts and functionality in Deswik.OPS to get you started.

Understand Deswik.OPS Concepts
- System date and live date
- Locations, activities, and equipment
- Delays, dependencies, and constraints

Explore the Location Timeline
- Adding and managing activities and equipment
- Configuring cycles and delays
- Entering comments regarding shifts, locations, and equipment

Use the Equipment Timeline
- Reviewing equipment allocation and movement
- Assessing the impact of delays

Use the Whiteboard
- Adding and managing equipment workcard assignmenta
- Managing activity lifecycles

Viewing Requirements

Deswik Client Portal account - To access this online module you need a Deswik Client Portal account. To register for an account, please click here.

Vimeo - This module contains videos that require you to have access to the Vimeo website.

Optional Deswik.OPS installation - If you have already implemented a Deswik.OPS environment with real or demonstration data, feel free to follow along in your environment to help reinforce the training material. Having the software implemented is not a prerequisite for this course. However, simply following the content and videos only initially will instil an excellent base understanding of the foundational concepts of Deswik.OPS.
